Revisions to SRS permit on M Area Hazardous Waste Management Facility

The U.S. Department of Energy (DOE)-Savannah River Operations Office has requested from the South Carolina Department of Health and Environmental Control (SCDHEC) a modification to Savannah River Site's 1992 Resource Conservation and Recovery Act (RCRA) Part B Permit Renewal Application, Volume III.

This volume details operations at the M Area Hazardous Waste Management Facility and Post-Closure Care.

The revision (Rev. 9) addresses the Southern Sector Corrective Action Plan and includes a description of the recirculation well operations; identification of specific numbers, locations, and screen intervals of the proposed groundwater recirculation wells; and the predicted capture zones super-

imposed over the most recent trichloroethene isoconcentration map.

More information, including the actual permit application, is available for review and copying at the DOE Public Reading Room located at the University of South Carolina-Aiken library, or by contacting personnel listed below.
